For the manly chef in touch with his inner geek, Lynx's SmartGrill series (\$6,000 to \$9,500) is simply the perfect grill. It mixes both brains and braun. The former includes Wi-Fi connectivity, built-in surface temperature sensors and the ability to control it directly with your voice or through a handy app. The latter is embodied by 16,000 BTU, an internally powered three-speed rotisserie and three variable temperature infrared burners. This fully functional force of outdoor cookery is available in 30-, 36- and 42-inch models, either with or without the optional matching cart.
